

At the **Faculty of Medicine** at the University of Bonn, the position of

### **W3 Professorship for Aging Medicine/Focus Oncogeriatrics (20%)**

is to be filled on a **permanent basis at the earliest opportunity**.

The professorship serves to establish a working group that further develops the methodology of geriatric assessment and the evaluation of frailty, multimorbidity, and polypharmacy as well as the risk/benefit analysis prior to multimodal treatment planning for geriatric patients with oncological diseases. The aim is to optimize the assessment of the risk/benefit ratio for oncological treatments including surgical interventions at an advanced age.

Due to the various links with neurosurgery and conservative neuro-oncology, long-standing expertise in the fields of **neurogeriatrics and oncogeriatrics** is required. As functional restrictions in old age are significantly determined by aging processes in the brain, expertise in the **imaging analysis** of brain aging processes is desirable. Within the Center for Integrated Oncology (CIO), the professorship is intended to significantly strengthen scientific and clinical cooperation **between the Faculty of Medicine/University Hospital Bonn and the Johanniter Clinics Bonn** in the entire spectrum of oncology and geriatrics. The professorship is based at the CIO Bonn. The ability to connect to the areas of research focus and networks of the Faculty of Medicine and the University as a whole is desirable. Experience in teaching in the field of geriatrics within the Human Medicine degree program is required.

The successful candidate must have completed a degree in medicine and **specialist certification in neurology with an additional qualification in geriatrics**, habilitation or equivalent academic achievements and teaching experience in accordance with section 36 of the University Law NRW.

The University of Bonn stands for diversity and equal opportunities. It is certified as a family-friendly university and has a dual career service. Its aim is to increase the proportion of women in areas where women are underrepresented and particularly support their careers. The University supports recruitment with the STEP program. Women with appropriate qualifications are strongly encouraged to apply. Applications are handled in accordance with the national equal opportunities law. Applications from suitable candidates with verified severe disabilities and persons with an equivalent status are also particularly welcome.

Qualified candidates are asked to apply via the Appointment Portal of the University of Bonn (<https://berufungsportal.uni-bonn.de/openProcedureList.do>). The application can be submitted in German or English by 13<sup>th</sup> December 2024.

Dean's Office in the Faculty of Medicine  
University of Bonn  
Venusberg-Campus 1 | Haus 33, 53127 Bonn
